

CALIFORNIA EVAPORATIVE EMISSION CONTROL WARRANTY STATEMENT

YOUR WARRANTY RIGHTS AND OBLIGATIONS

The California Air Resources Board and Crary® Industries, Inc. ("Crary") are pleased to explain the evaporative emission control system ("EECS") warranty on your 2019 debris loader. In California, new equipment must be designed, built and equipped to meet the State's stringent anti-smog standards. Crary must warrant the EECS on your debris loader for the period listed below provided there has been no abuse, neglect or improper maintenance of your equipment leading to the failure of the EECS.

Your EECS may include parts such as: carburetors, fuel tanks, fuel lines (for liquid fuel and fuel vapors), fuel caps, valves, canisters, filters, clamps, connectors, and other associated components.

MANUFACTURER'S WARRANTY COVERAGE:

This EECS is warranted for two (2) years. If any evaporative emission-related part on your equipment is defective, the part will be repaired or replaced by Crary.

OWNER'S WARRANTY RESPONSIBILITIES:

As the debris loader owner, you are responsible for performance of the required maintenance listed in your owner's manual. Crary recommends that you retain all receipts covering maintenance on your debris loader, but Crary cannot deny warranty coverage solely for the lack of receipts.

As the debris loader owner, you should be aware that Crary may deny you warranty coverage if your debris loader or a part has failed due to abuse, neglect, or improper maintenance or unapproved modifications.

You are responsible for presenting your debris loader to Crary's distribution center or service center as soon as the problem exists. The warranty repairs shall be completed in a reasonable amount of time, not to exceed thirty (30) days. If you have a question regarding your warranty coverage, you should contact Crary Industries Warranty Center (Outdoor Power Equipment) at 1-888-625-4520.

DEFECTS WARRANTY REQUIREMENTS:

Crary warrants to the ultimate purchaser and each subsequent purchaser that the debris loader is:

Designed, built and equipped so as to conform to all applicable regulations and free from defects in materials and workmanship that cause the failure of a warranted part for a period of two (2) years.

The warranty on evaporative emissions-related parts will be interpreted as follows:

- (1) Any warranted part that is not scheduled for replacement as required maintenance in the written instructions supplied, must be warranted for the warranty period stated above. If any such part fails during the period of warranty coverage, the part must be repaired or replaced by Crary according to subsection (4) below. Any such part repaired or replaced under the warranty must be warranted for a time not less than the remaining warranty period.
- (2) Any warranted part that is scheduled only for regular inspection in the written instructions supplied must be warranted for the warranty period stated above. Any such part repaired or replaced under warranty must be warranted for a time not less than the remaining warranty period.
- (3) Any warranted part that is scheduled for replacement as required maintenance in the written instructions supplied is warranted for the period of time prior to the first scheduled replacement point for that part. If the part fails prior to the first scheduled replacement, the part must be repaired or replaced by Crary according to subsection (4) below. Any such part repaired or replaced under warranty must be warranted for a time not less than the remainder of the period prior to the first scheduled replacement point for the part.

- (4) Repair or replacement of any warranted part under the warranty provisions herein must be performed at no charge to the owner at a warranty station.
- (5) Notwithstanding the provisions of subsection (4) above, warranty services or repairs must be provided at distribution centers that are franchised to service the subject engines or equipment.
- (6) The debris loader owner must not be charged for diagnostic labor that leads to the determination that a warranted part is in fact defective, provided that such diagnostic work is performed at a warranty station.
- (7) Throughout the debris loader warranty period set out above, Crary or Crary's contracted warranty provider must maintain a supply of warranted parts sufficient to meet the expected demand for such parts and must obtain additional parts if that supply is exhausted.
- (8) Crary-approved replacement parts that do not increase the exhaust or evaporative emissions of the engine or EECS must be used in the performance of any warranty maintenance or repairs and must be provided without charge to the owner. Such use will not reduce the warranty obligations of Crary or Crary's contracted warranty provider.
- (9) Add-on or modified parts that are not exempted by the Air Resources Board may not be used. The use of any non-exempted add-on or modified parts by the ultimate purchaser may be grounds for disallowing a warranty claim. Crary or Crary's contracted warranty provider will not be liable to warrant failures of warranted parts caused by the use of a non-exempted add-on or modified part.
- (10) Crary shall provide any documents that describe Crary's warranty procedures or policies within five working days of request by the Executive Officer.

WARRANTED PARTS:

The repair or replacement of any warranted part otherwise eligible for warranty coverage may be excluded from such warranty coverage if Crary demonstrates that the debris loader has been abused, neglected, or improperly maintained, and that such abuse, neglect, or improper maintenance was the direct cause of the need for repair or replacement of the part. That notwithstanding, any adjustment of a component that has a factory installed, and properly operating, adjustment limiting device is still eligible for warranty coverage. The following emission warranty parts are covered:

- (1) Fuel Tank
- (2) Fuel Cap
- (3) Fuel Lines (for liquid fuel and fuel vapors)
- (4) Fuel Line Fittings
- (5) Clamps*
- (6) Pressure Relief Valves*
- (7) Control Valves*
- (8) Control Solenoids*
- (9) Electronic Controls*
- (10) Vacuum Control Diaphragms*
- (11) Control Cables*
- (12) Control Linkages*
- (13) Purge Valves*
- (14) Gaskets*
- (15) Liquid/Vapor Separator
- (16) Carbon Canister
- (17) Canister Mounting Brackets
- (18) Carburetor Purge Port Connector*

*As they relate to the evaporative emission control system.
